PRESENTATION:

School and Teaching is a Humanities' subject of a philosophical nature that introduces students to the current state of affairs in education. In this course we will discuss education, schooling and teaching as concepts and practices that vary depending on human need and that cannot be separated from cultural and political considerations. We will pay close attention to the tools schools and teachers use to structure educational activities (like curricula, standards, policies, etc.). To expand students' knowledge about school and teaching beyond Spain, we will examine other countries and contexts.

During this course, students will develop skills in searching for relevant facts and information to help answer questions and engage in meaningful discussion. Accordingly, students will be active participants in the class and will be expected to engage in peer-teaching exercises.

PRE-REQUISITES:

Students should have a **B1 level of English** to be enrolled in this degree program and course. If you have not reached this level yet, you will need to take extra steps to improve your level of English in order to be happy and successful in this class. It is your responsibility to reach the level required through independent study and language support courses. USJ offers fantastic courses through the ILM (Instituto de Lenguas Modernas) that provide language support classes for those students who have not reached the required B1 level. These courses are **highly** recommended. Speak to your lecturer regarding how you can enroll in one of these courses.

TEACHING AND LEARNING METHODOLOGIES AND ACTIVITIES:

Teaching and learning methodologies and activities applied:

A wide range of teaching and learning methodologies will be used in this course. Given the results of academic research on learning, students will be required to participate actively in class and hence will construct their learning and opinions on a variety of topics. Students will be introduced to new ideas in participative lectures and readings. **Students should be prepared to spend a good deal of time reading scholarly material** and digesting the argument found in readings. Since the material covered in this class is complex, students are expected to develop and justify their own opinions and ideas about a range of topics. Accordingly, class will include debates, role-playing exercises and writing activities.

Different active methodologies will also be present during the course such as "Flipped Classroom" activities and Cooperative Learning. Since the subject will be taught through English, a CLIL approach will be used by the lecturer throughout the course. Students will be expected to work on a portfolio on a regular basis in which they review material covered in class and work to develop their own opinions.

Students will also be expected to attend tutorials in which they can discuss individual or group work. The lecturer will inform students about tutorial times. Students will be asked to make a previous appointment with their lecturer.

"Independent study" is an important part of this course so that students can develop into be more autonomous learners. Independent study time should largely be dedicated to working on the portfolio, which will be a compendium of all learned material and hence will be an excellent tool for studying for the final exam.
