## PRESENTATION:

Within modern society, the family and the school are the two major socializing agents for developing children. This course looks at these two socializing agents and asks students to reflect on how they can work together or find themselves at odds with one another. Given that western societies are becoming increasingly diverse, young children enter school with different ideas, concepts and levels of preparedness. This diversity can be seen as an opportunity and a challenge for educators, and this course provides students with a chance to reflect on important issues related to the sociology of education and the ways of building bridges between schools and families. This course also turns to important social and political issues found in modern society that have a bearing on children's education. This subject is part of the module *Sociedad, Familia y Escuela* and has thematic links to the courses *Orientación educativa* and *Atención a la diversidad, interculturalidad, igualdad y educación inclusiva*.

## PROFESSIONAL COMPETENCES ACQUIRED IN THE SUBJECT:

<b>General programme competences</b>	G01	Capacity to analyse and synthesise information from different sources.	
	G02	Capacity to effectively solve problems and take decisions based on the knowledge and competences acquired.	
	G03	Capacity to organise, plan and self-assess the work undertaken.	
	G05	Capacity to work in a team and cooperate with other professionals from the same or a different sector.	
	G07	Capacity for interpersonal communication in English (oral and written) at a minimum B2 level (per the Common European Framework of Reference for Languages) to adapt to the academic and professional requirements of the Degree.	
	G08	Capacity to absorb social and humanistic concepts within a rounded university education which allows the development of ethical values such as solidarity, interculturality, equality, commitment, respect, diversity, integrity, etc.	
	G09	Capacity to formulate social transformation proposals, considered ethically, based on democracy and basic rights.	
	G10	Capacity to generate new ideas through initiative, innovation and creativity for effective adaptation to educational needs and the job market.	
	G11	Capacity to establish and fulfil the most suitable quality criteria and to employ work methods and strategies oriented towards continuous improvement.	
	G12	Capacity to self-assess, nurturing learning, scientific research, practice based on evidence and scientific and social progress.

		R03	Consider the social dimension of education.
		R04	Recognise the influence exercised by the cultural and social environment on the school.
R05		Consider the importance of the family in a child's education and, consequently, encourage them to participate at school, recognising the contribution of different cultures in creating a plural society.	

#### PRE-REQUISITES:

Students should have a solid **B1 level** to be enrolled in this degree program and course. If you have not reached this level yet, you will need to take extra steps to improve your level of English in order to be happy and successful in this class. It is your responsibility to reach the level required through independent study and language support courses. USJ offers fantastic courses through the ILM (Instituto de Lenguas Modernas) that provide language support classes for those students who have not reached the required B1 level. These courses are **highly** recommended. Speak to your lecturer regarding how you can enroll in one of these courses.

## **TEACHING AND LEARNING METHODOLOGIES AND ACTIVITIES:**

### **Teaching and learning methodologies and activities applied:**

A wide range of teaching and learning methodologies will be used in this course. Given the results of academic research on learning, students will be required to participate actively in class and hence will construct their learning and opinions on a variety of topics. Students will be introduced to new ideas in participative lectures and readings. Since the material covered in this class is complex, subjective and personal, students are expected to develop and justify their own opinions and ideas about a range of topics. Accordingly, class will include debates and role-playing exercises.

Different active methodologies will also be present during the course such as "Flipped Classroom" activities and Cooperative Learning. Since the subject will be taught through English, a CLIL approach will be used by the lecturer throughout the course. Students will be expected to work a portfolio on a regular basis in which they review material covered in class and work to develop their own opinions.

Students will be encouraged to attend activities outside the classroom which may be of interest to them, such as Learning Space sessions or diverse exhibitions.

Students will also be expected to attend tutorials in which they can discuss individual or group work. The lecturer will inform students about tutorial times. Students will be asked to make a previous appointment with their lecturer.

"Independent study" is an important part of this course so that students can develop to be more autonomous. Independent study time should largely be dedicated to working on the portfolio, which will be a compendium of all learned material and hence will be an excellent tool for studying for the final exam.
